EXAMINER'S AMENDMENT

The following is an examiner's statement of reasons for allowance: The subject matter of the independent claims could either not be found or was not suggested in the prior art. The subject matter not found was the use of two electrodes in one chamber, one electrode in another chamber, measuring the time difference from a first fiducial point from the one electrode to a second fiducial point of one of the two electrodes, measuring the time difference from the first fiducial point from the one electrode to the second fiducial point in the other electrode of the two electrodes, and selecting one of the two electrodes for stimulation based on the measuring steps, in combination with the other steps or elements in the claim.

The closest prior art of Nickolls uses several electrodes in a chamber and measures which heart response occurs first at one of the several electrodes to determine which electrode to deliver stimulation to, but does not measure time differences from another electrode in another chamber and does not determine the appropriate electrode to deliver stimulation to based on the measurements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
